

Dear Valued Patients,

Our entire team here at the Dermatology Center of Steamboat Springs and Aesthetica Medical Spa would like to you that we have heightened all of our precautionary standards and procedures to maximum levels to ensure the safety and well-being of our patients and staff as we learn more about COVID-19 (coronavirus) during this uncertain time.

You may rest assured that our office is following all the strict guidelines, recommendations and regulations of the State Department of Health, Centers for Disease Control, as well as the World Health Organization as we receive updates on an hourly basis.

While we continue to practice universal precautions and observe strict sterilization practices as we always do, we are taking extraordinary measures to disinfect the common areas in our office as well.

Over the past few weeks, we have significantly increased the frequency of cleaning and wiping down of countertops, patient check-in areas, door handles, bathroom facilities, waiting room chair seat and arms and all other common points of contact. We are rearranging our schedule to stagger patient appointments to ensure there are a minimum number of people in our office at one time.

We are asking our own office staff to stay home if they have any symptoms suggestive of a cold, flu, or respiratory illness.

To protect you, our staff, and elderly patients, if you have been potentially exposed to or experience flu-like symptoms to please cancel your appointment at our office.

If you are feeling sick, we ask for you to please contact your primary care physicians or local hospitals for screening and treatment.

If you have any questions or concerns, we are here to assist you in any way.

Thank you for your understanding and please be safe.

Dr. Sandra Eivins and Staff
